- **DESIGNERS:**
Tom Lemkuil
Wayne Dau

The Spring Valley Health Care and Rehabilitation Center is laid

out and constructed with all single-occupancy suites with private bathroom design. The center is a total replacement facility for Spring Valley Health Care Center; a nursing home building originally constructed in 1962. The natural beauty of the Spring Valley area is evident throughout the entire campus with outdoor patios, gardens, and strolling paths with sitting areas. The center truly offers a "home-like feeling" making this a spectacular and special place to call home.
